What is your specialty?

Our new Liquid Facelift is definitely our most popular service. This procedure uses an "arching" technique to administer dermal fillers to lift skin on the aging face. To date, only a handful of cosmetic medicine doctors are using this technique around the country. The new "lifting" technique redirects the skin laterally and upward.

What brands do you carry?

At Destinations, we are proud to offer Plurimi, our private-label, physician-only skin-care line. Plurimi means "of the highest worth" in Latin and we believe these special products offer just that, both in terms of price and efficacy.

What makes your business unique?

Destinations Medical Spa is the region's first and only mobile, doctor-managed cosmetic care service that provides the latest in laser, Botox, injectable and other spa treatments in the comfort and privacy of the home, office or partnering day spa.
